

Lime Energy Launches New Website

ELK GROVE VILLAGE, IL, May 8, 2007 - Lime Energy Co. (OTC BB: LMEC), a developer, manufacturer and integrator of energy savings technologies today announced the Company has launch its new web site at www.lime-energy.com.

The site allows for easy navigation so that visitors are able to learn more about the generous utility incentives, tax advantages and enhanced lighting quality that are available through products and services provided by Lime Energy. In addition, investors can learn more about the company through an investor presentation available at the Investor Relations section of the new website.

The scope of Lime Energy's products and services such as energy efficiency audits, energy master plans, energy procurement, technical and financial analysis, energy efficient lighting upgrades, cogeneration, solar generation, demand response, rebate procurement and Lime Energy's trademark energy efficient HVAC technology eMAC, which reduces energy while keeping the air conditioner on, are all outlined at <http://www.lime-energy.com> to paint a picture of the common, dramatic savings of 35% to 65% for the company's recognizable clientele.

The new website also illustrates multiple case studies summarizing success stories of Lime Energy's clients who have realized dramatic returns on their investments. The case studies also include testimonials confirming Lime Energy's commitment to lead the energy efficient movement by passionately serving its customers, including some of the nation's leading corporations, as well as its shareholders and the surrounding communities.

For over 26 years, Lime Energy has provided energy efficiency solutions that allow clients to spend dramatically less on energy and building operations. Through the use of its products and services, Lime Energy's clients realize a more comfortable and productive physical environment and generate less energy waste, thus providing a cleaner natural environment.

About Lime Energy Co.

Lime Energy, ("Less is More Efficient") is one of the nation's leading energy efficiency technology and engineering companies. Lime brings together more than 75 years of experience in design, engineering and installation of energy efficient solutions providing customers with guaranteed saving results and high returns on invested capital. By efficiently reducing the amount of electricity Lime customers use, they are able to both save money and become better corporate citizens through the reduction of unnecessary greenhouse gas emissions ("Nothing Greener than Energy Not Used"). Lime Energy is headquartered in Elk Grove Village, Illinois with offices in New York, Texas, Utah, and throughout California. The company's stock is traded on the OTC Bulletin Board under the symbol LMEC. Additional information is available at the company's website at <http://www.lime-energy.com> or by calling 847.437.1666.
