Enhanced Patient Care through Smart Facilities

Maximize incentives through a comprehensive energy partnership.

The New Jersey P4P Program

THE NJ PAY FOR PERFORMANCE PROGRAM for existing buildings is an incentive program available for commercial, industrial, and multifamily buildings with a peak demand in excess of 100 kW in any of the preceding twelve months. As an approved NJ P4P program partner, Lime Energy has extensive experience in identifying, designing and installing comprehensive energy saving solutions capable of reducing the existing energy consumption of your building by 15% or more, as required to qualify for the incentive.

Pay for Performance incentives are awarded upon the satisfactory completion of three program milestones: Complete energy reduction plan, installation of recommended measures, and validation of Post-Construction Utility Reduction. Lime Energy has achieved these milestones with customers throughout New Jersey. Lime Energy also recommends and implements additional energy incentive programs offered by the State.

LIME ENERGY IS AN APPROVED AND EXPERIENCED NJ P4P PARTNER

Proven Integrated Delivery Platform

Since 1980, Lime Energy has worked in scores of building types, including high-rise office buildings, mixed-use complexes, manufacturing plants, retail sites, data centers, banks, sports complexes, large government sites, schools and hospitals. All projects are served by a seasoned staff of engineers, certified energy managers, technicians, construction and installation professionals.

This broad range of experience in energy efficiency technologies and services assures the highest quality analysis, design and project installation.

Lime Energy is a certified NJ P4P partner through our Applied Energy Management subsidiary.

Spotlight Customer

ATLANTICARE

AtlantiCare is an integrated system of services designed to help people achieve optimal health. Its more than 5,170 employees and 600 physicians serve the community in more than 60 locations.

Lime Energy worked with three AtlantiCare locations throughout Atlantic County , NJ to create and implement a comprehensive energy savings plan that allowed the customer to qualify for the NJ Pay for Performance incentives. Lime performed energy audits, identified and validated energy measures, and implemented a comprehensive utility plan that reduced AtlantiCare's energy consumption by up to 20%.

LIME'S INTEGRATED PLATFORM - RISK REDUCTION & INCREASED INCENTIVES

A key success factor to the project was Lime's ability to also perform the retrofit design specifications and constructing of the energy saving measures. This integrated approach compressed the overall project timeline and reduced many areas of risk associated with retrofitting existing facilities. Additionally, Lime will be providing the energy validation to maximize P4P incentives back to AtlantiCare. The comprehensive solution was implemented from design through implementation with no operational impact to the hospital's schedule.

ATLANTICARE & NJ P4P

Under the NJ P4P program, AtlantiCare is guaranteed half of the 15% incentive dollars which they will receive after close-out and project walk through by the NJBPU to insure work reported was work installed. After a (1) period of monitoring utility reductions and vaildating the 15% reduction, the hospital will receive the balance of the incentive. AtlantiCare will maximize the P4P incentive by achieving a 20% overall utility Reduction. *See below for project metrics.*

ATLANTICARE PROJECT MATRIX

Total Project Cost	\$3,943,072
Annual Savings	\$1,248,479
15% Utilty Reduction Incentive	\$1,611,536
Total Project Cost	\$2,331,536
Payback	1.7 years

About Lime Energy

Lime Energy is a leading provider of energy efficiency services. Our integrated energy engineering, consulting and implementation solutions dramatically save energy at client facilities, reduce operations and maintenance costs and improve building infrastructure and value. We actively assist clients in managing their carbon footprint to limit the environmental impact of operations.
