Energy Efficiency.
Delivered.

“ Lime Energy, under contract to National Grid, has installed over 1,800 projects under the Small Business Energy Efficiency Program saving our customers 55 million kWh and \$6.7 million annually on their electric bills. Lime Energy’s expertise in auditing and installation of lighting and lighting controls has allowed our customers to benefit from \$12.5 million in National Grid Incentive monies. Together we are committed to reducing electric consumption. ”

- Kathleen George -
Small Business Program
Manager, National Grid

Lime Energy is a national leader in program implementation for utility energy efficiency programs, with a long track record of success in meeting savings goals for our utility clients across a wide range of direct install programs.

Lime Energy’s vertically integrated service platform provides our utility clients with a single source provider option to manage and implement custom designed efficiency programs. Utilities turn to Lime in confidence that we will help them to satisfy the regulatory and environmental compliance requirements set forth by State and Federal regulators.

Program Administration

Lime Energy provides utility clients with a clear understanding of “Best Practices” to successfully and effectively deliver energy reductions through non-traditional Energy Efficiency Program Management and Administration. Our unique program administration process allows our utility clients to take advantage of our experience, energy reduction methodology, and proven engineering.

Program Implementation

A seamless, vertically integrated turn-key program implementer, Lime Energy goes beyond traditional methods of delivering energy efficiency focused implementations. Our professionals across sales & marketing, energy engineering and construction collaborate to deliver energy efficiency resources for our utility clients. Through our unique program implementation methodology Lime Energy has consistently exceeded Utility program goals, notably under the Small Business Direct Install programs.

Auditing and Project Installation

As a nationally recognized energy engineering firm, Lime Energy affords our utility clients the energy auditing capabilities for a multitude of programs serving all customer segments. From energy opportunity assessments for a warehouse to investment grade audits for an industrial facility to full building modeling, retro-commissioning and installation design for multi-site portfolios. Lime Energy utilizes program tested process/procedures, experienced auditors and implementation teams that ensure quality in communication, engineering, quality assurance and completion assurance.

Information Services

As part of a comprehensive program solution delivery mechanism, Lime Energy incorporates a flexible web-native technology platform that offers an array of tools to support our Utility Client’s specific program requirement. Our information services solution supports the entire utility energy efficiency program lifecycle from program management to program administration to program implementation creating a seamless flow of customer, project and results information; creating a centralized knowledge base that can drive informed strategic decisions.

We Deliver on our Promises

Lime Energy has been delivering new and alternative energy strategies for over 30 years.

By combining our strategic insight, custom program design and implementation capabilities, we are helping our customers realize the benefits of emerging policy and technology initiatives.

Customer Spotlights

National Grid Small Business Direct Install Program

National Grid | New York, NY

Lime Energy is providing program implementation for National Grid’s Small Business Direct Install Program, one of the nation’s most successful Demand Side Management (DSM) programs. Lime is the exclusive provider for the Western New York and Frontier regions of National Grid’s New York State service territory, and in 2010 Lime was the only SBDI Contractor in New York State to achieve their savings goal.

New Jersey Statewide Small Business Direct Install Program

New Jersey’s Clean Energy Program

Lime Energy is providing program management and implementation services for New Jersey’s Statewide Small Commercial & Industrial Direct Install Energy Efficiency Retrofit Program. Lime is the exclusive provider for the Northeast region including Bergen, Essex and Hudson counties, for what is one of the State’s most wide-ranging Demand Side Management programs ever. In 2010 we exceeded our goal and provided more savings than any other contractor in the Program.

Our business focuses on three important areas for clean energy:

Energy Efficiency

to reduce consumption

Renewable Solutions

to find new and cleaner ways of producing energy

Utility Partnerships

to optimize and prepare

customers for a new energy and smart grid

environment.
