

Location: **New York, NY**

Since July 2002 P.C. Richard & Son and Lime Energy have engaged in four rounds of contract extensions. Currently, the eMAC and uMAC systems are deployed in all 54 P.C. Richard facilities and are specified for installation in all new construction projects. The company recognizes the value of the docu-

mented energy savings and the energy expertise provided by Lime. Lime has also designed and installed an emergency generator system for the retail stores corporate operation center (summer 2005) and continues to provide energy and operational support to the growing chain.

Benefits:

- Standard space condition temperatures
- Setback of all heating/cooling for unoccupied times
- Setback of lighting for unoccupied times
- Validation of service expenditures is recorded
- Reports for all resolutions to service dispatches

Highlights:

Number of Sites Installed to Date: 54 stores
Square Footage of Sites: 15-20,000 sq ft each
Number of eMAC's Installed: 353
ROI: 60%
Payback Period: 1.7 Years
Annual Energy Savings (kwh): 10,900,000
Annual Dollar Savings: \$1.75 Million

“A comfortable store environment keeps our customers happy. Lime Energy is working with us to continuously achieve that goal”

- Peter C. Richard
Exec. Vice President
